| 1. Percent of youth with IEPs graduating from high school with a regular diploma. (20 U.S.C. 1416 (a)(3)(A)) | **Data Source:**
Same data as used for reporting to the Department under Title I of the Elementary and Secondary Education Act (ESEA).
**Measurement:**
States must report using the adjusted cohort graduation rate required under the ESEA. | **Sampling is not allowed.**
Describe the results of the State’s examination of the data for the year before the reporting year (e.g., for the FFY 2013 APR, use data from 2012-2013), and compare the results to the target. Provide the actual numbers used in the calculation.
Provide a narrative that describes the conditions youth must meet in order to graduate with a regular diploma and, if different, the conditions that youth with IEPs must meet in order to graduate with a regular diploma. If there is a difference, explain why. Targets should be the same as the annual graduation rate targets under Title I of the ESEA. |
| 2. Percent of youth with IEPs dropping out of high school. (20 U.S.C. 1416 (a)(3)(A)) | **OPTION 1:**
**Data Source:**
Same data as used for reporting to the Department under IDEA section 618.
**Measurement:**
States must report a percentage using the number of youth with IEPs (ages 14-21) who exited special education due to dropping out in the numerator and the number of all youth with IEPs who left high school (ages 14-21) in the denominator.

**OPTION 2:**
Use same data source and measurement that the State used to report in its FFY 2010 APR that was | **Sampling is not allowed.**
**OPTION 1:**
Use 618 exiting data reported to the Department, and the definitions specified, in the EDFacts file specification C009.
http://www2.ed.gov/about/inits/ed/edfacts/eden/non-xml/c009-9-0.doc

Include in the denominator the following exiting categories:  (a) graduated with a regular high school diploma; (b) received a certificate; (c) reached maximum age; (d) dropped out; or (e) died.

Do not include in the denominator the number of youths with IEPs who exited special education due to: (a) transferring to regular education; or (b) who... |

4. Rates of suspension and expulsion:

A. Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and

B. Percent of districts that have: (a) a significant discrepancy, by race or

**Data Source:**

Data collected under section 618 of the Individuals with Disabilities Education Act (IDEA) (Report of Children with Disabilities Subject to Disciplinary Removal). Discrepancy can be computed by either comparing the rates of suspensions and expulsions for children with IEPs to rates for nondisabled children within the LEA or by comparing the rates of

**Sampling from State’s 618 data is not allowed.**

Describe the results of the State’s examination of the data for the year before the reporting year (e.g., for the FFY 2013 APR, use data from 2012-2013), including data disaggregated by race and ethnicity to determine if significant discrepancies are occurring in the rates of long-term suspensions and expulsions of children with IEPs, as required at 20 U.S.C.
<table>
<thead>
<tr>
<th>Monitoring Priorities and Indicators</th>
<th>Data Source and Measurement</th>
<th>Instructions for Indicators/Measurement</th>
</tr>
</thead>
</table>
| ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards. (20 U.S.C. 1416(a)(3)(A); 1412(a)(22)) | suspensions and expulsions for children with IEPs among LEAs within the State. **Measurement:**  
A. Percent = \[\frac{\text{(# of districts that have a significant discrepancy in the rates of suspensions and expulsions for greater than 10 days in a school year of children with IEPs) divided by the (# of districts in the State)}}{100} \]  
B. Percent = \[\frac{\text{(# of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rates of suspensions and expulsions of greater than 10 days in a school year of children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards) divided by the (# of districts in the State)}}{100} \]  
Include State’s definition of “significant discrepancy.” | **1412(a)(22).** The State’s examination must include one of the following comparisons:  
- The rates of suspensions and expulsions for children with IEPs among LEAs within the State; or  
- The rates of suspensions and expulsions for children with IEPs to nondisabled children within the LEAs.  
In the description, specify which method the State used to determine possible discrepancies and explain what constitutes those discrepancies. If the State used a minimum “n” size requirement, report the number of districts excluded from the calculation as a result of this requirement. States have the option of using the “total number of districts” OR the “number of districts that meet the State’s minimum n size for one or more racial/ethnic group” as the denominator in the calculation for B4A or B4B.  
For 4A, provide the actual numbers used in the calculation and if significant discrepancies occurred, describe how the State educational agency reviewed and, if appropriate, revised (or required the affected local educational agency to revise) its policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, to ensure that such policies, procedures, and practices comply with applicable requirements.  
For 4B, provide the following: (a) the number of districts that have a significant discrepancy, by race or ethnicity, in the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) the number of districts in which policies, procedures or practices contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, to ensure that such policies, procedures, and practices comply with applicable requirements. |

<tr>
<td>b. # of children whose evaluations were completed within 60 days (or State-established timeline). Account for children included in (a), but not included in (b). Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays. Percent = [(b) divided by (a)] times 100.</td>
</tr>
</tbody>
</table>

**Instructions for Indicators/Measurement**

Note that under 34 CFR §300.301(d), the timeframe set for initial evaluation does not apply to a public agency if: (1) The parent of a child repeatedly fails or refuses to produce the child for the evaluation; or (2) A child enrolls in a school of another public agency after the timeframe for initial evaluations has begun, and prior to a determination by the child’s previous public agency as to whether the child is a child with a disability. States should not report these exceptions in either the numerator (b) or denominator (a). If the State-established timeframe provides for exceptions through State regulation or policy, describe cases falling within those exceptions and include in b. Targets must be 100%.

Provide detailed information about the timely correction of noncompliance as noted in OSEP’s response table for the previous APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

---

### Effective General Supervision Part B / Effective Transition

**Effective General Supervision Part B / Effective Transition**

12. Percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays. (20 U.S.C. 1416(a)(3)(B))

**Data Source:**

Data to be taken from State monitoring or State data system.

**Measurement:**

a. # of children who have been served in Part C and referred to Part B for Part B eligibility determination.

b. # of those referred determined to be NOT eligible

**If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.**

| and whose eligibility was determined prior to their third birthdays.  
c. # of those found eligible who have an IEP developed and implemented by their third birthdays.  
d. # of children for whom parent refusal to provide consent caused delays in evaluation or initial services or to whom exceptions under 34 CFR §300.301(d) applied.  
e. # of children determined to be eligible for early intervention services under Part C less than 90 days before their third birthdays.  
Account for children included in (a), but not included in b, c, d, or e. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed, and the reasons for the delays.  
Percent = [(c) divided by (a - b - d - e)] times 100.  |
| calculation.  
Targets must be 100%.  
Provide detailed information about the timely correction of noncompliance as noted in OSEP’s response table for the previous APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.  |

### 13. Percent of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student’s transition services needs.

- **Data Source:** Data to be taken from State monitoring or State data system.
- **Measurement:** Percent = [(# of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student’s transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority) divided by the (# of If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.  
Describe the results of the calculations and compare the results to the target. Describe the method used to collect these data and if data are from the State’s monitoring, describe the procedures used to collect these data. Provide the actual numbers used in the calculation.  
Targets must be 100%.  
Provide detailed information about the timely correction of noncompliance as noted in OSEP’s response table for the previous APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any enforcement actions that were taken.  }

14. Percent of youth who are no longer in secondary school, had IEPs in effect at the time they left school, and were:

A. Enrolled in higher education within one year of leaving high school.
B. Enrolled in higher education or competitively employed within one year of leaving high school.
C. Enrolled in higher education or in some other postsecondary education or training program; or competitively employed or in some other employment within one year of leaving high school.

(20 U.S.C. 1416(a)(3)(B))

**Data Source:**
State selected data source.

**Measurement:**
A. Percent enrolled in higher education = [# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education within one year of leaving high school] divided by the [# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school] times 100.
B. Percent enrolled in higher education or competitively employed within one year of leaving high school = [# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education or competitively employed within one year of leaving high school] divided by the [# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school] times 100.
C. Percent enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment = [# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment] divided by the [# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school] times 100.

**Sampling of youth who had IEPs and are no longer in secondary school is allowed. When sampling is used, submit a description of the sampling methodology outlining how the design will yield valid and reliable estimates of the target population. (See General Instructions on page 2 for additional instructions on sampling.)**

Collect data by September 2014 on students who left school during 2012-2013, timing the data collection so that at least one year has passed since the students left school. Include students who dropped out during 2012-2013 or who were expected to return but did not return for the current school year. This includes all youth who had an IEP in effect at the time they left school, including those who graduated with a regular diploma or some other credential, dropped out, or aged out.

**I. Definitions**

**Enrolled in higher education** as used in measures A, B, and C means youth have been enrolled on a full- or part-time basis in a community college (two year program) or college/university (four or more year program) for at least one complete term, at any time in the year since leaving high school.

**Competitive employment** as used in measures B and C means that youth have worked for pay at or above the minimum wage in a setting with others who are nondisabled for a period of 20 hours a week for at least 90 days at any time in the year since leaving high school. This includes military employment.

**Enrolled in other postsecondary education or training** as used in measure C, means youth have been
enrolled on a full- or part-time basis for at least 1 complete term at any time in the year since leaving high school in an education or training program (e.g., Job Corps, adult education, workforce development program, vocational technical school which is less than a two year program).

Some other employment as used in measure C means youth have worked for pay or been self-employed for a period of at least 90 days at any time in the year since leaving high school. This includes working in a family business (e.g., farm, store, fishing, ranching, catering services, etc.).

II. Data Reporting

Provide the actual numbers for each of the following mutually exclusive categories. The actual number of “leavers” who are:

1. Enrolled in higher education within one year of leaving high school;
2. Competitively employed within one year of leaving high school (but not enrolled in higher education);
3. Enrolled in some other postsecondary education or training program within one year of leaving high school (but not enrolled in higher education or competitively employed);
4. In some other employment within one year of leaving high school (but not enrolled in higher education, some other postsecondary education or training program, or competitively employed).

“Leavers” should only be counted in one of the above categories, and the categories are organized hierarchically. So, for example, “leavers” who are enrolled in full- or part-time higher education within one year of leaving high school should only be reported in category 1, even if they also happen to be employed. Likewise, “leavers” who are not

INDICATOR 17 – STATE SYSTEMIC IMPROVEMENT PLAN

MONITORING PRIORITY – GENERAL SUPERVISION

INDICATOR: The State’s SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

MEASUREMENT: The State’s SPP/APR includes an SSIP that is a comprehensive, ambitious, yet achievable multi-year plan for improving results for children with disabilities. The SSIP includes the components described below.

INSTRUCTIONS FOR THE INDICATOR/MEASUREMENT –

Baseline Data: In its FFY 2013 SPP/APR, due February 1, 2015, the State must provide FFY 2013 baseline data that must be expressed as a percentage and which is aligned with the State-identified Measurable Result(s) for Children with Disabilities.

Targets: In its FFY 2013 SPP/APR, due February 1, 2015, the State must provide measurable and rigorous targets (expressed as percentages) for each of the five years from FFY 2014 through FFY 2018. The State’s FFY 2018 target must demonstrate improvement over the State’s FFY 2013 baseline data.

Updated Data: In its FFYs 2014 through FFY 2018 SPPs/APRs, due February 2016 through February 2020, the State must provide updated data for that specific FFY (expressed as percentages) and that data must be aligned with the State-identified Measurable Result(s) for Children with Disabilities. In its FFYs 2014 through FFY 2018 SPPs/APRs, the State must report on whether it met its target.

OVERVIEW OF THE THREE PHASES OF THE SSIP: It is of the utmost importance to improve results for children with disabilities by improving educational services, including special education and related services. Stakeholders, including parents of children with disabilities, local educational agencies, the State Advisory Panel, and others, are critical participants in improving results for children with disabilities and should be included in developing, implementing, evaluating, and revising the SSIP and included in establishing the State’s targets under Indicator 17. The SSIP should include information about stakeholder involvement in all three phases.

Phase I: Analysis (which the State must include with the February 2, 2015 submission of its SPP/APR for FFY 2013):

- Data Analysis;
- Analysis of State Infrastructure to Support Improvement and Build Capacity;
- State-identified Measurable Result(s) for Children with Disabilities;
- Selection of Coherent Improvement Strategies; and
- Theory of Action.

Phase II: Plan (which, in addition to the Phase 1 content (including any updates) outlined above, the State must include with the February 1, 2016 submission of its SPP/APR for FFY 2014):

- Infrastructure Development;
- Support for local educational agency (LEA) Implementation of Evidence-Based Practices; and
- Evaluation.

Phase III: Implementation and Evaluation (which, in addition to the Phase I and Phase II content (including any updates) outlined above, the State must include with the February 1, 2017 submission of its SPP/APR for FFY 2015, and update in 2018, 2019, and 2020):
• Results of Ongoing Evaluation and Revisions to the SSIP.

SPECIFIC CONTENT OF EACH PHASE OF THE SSIP

Phase I: Analysis

Phase I of the SSIP includes a detailed analysis that will guide the selection of coherent improvement strategies to increase the State’s capacity to lead meaningful change in LEAs to improve results for children with disabilities. Phase I must include the following five areas:

• Data Analysis: A description of how the State identified and analyzed key data, including data from SPP/APR indicators, 618 data collections, and other available data as applicable, to: (1) select the State-identified Measurable Result(s) for Children with Disabilities, and (2) identify root causes contributing to low performance. The description must include information about how the data were disaggregated by multiple variables (e.g., LEA, region, race/ethnicity, gender, disability category, placement, etc.). As part of its data analysis, the State should also consider compliance data and whether those data present potential barriers to improvement. In addition, if the State identifies any concerns about the quality of the data, the description must include how the State will address these concerns. Finally, if additional data are needed, the description should include the methods and timelines to collect and analyze the additional data.

• Analysis of State Infrastructure to Support Improvement and Build Capacity: A description of how the State analyzed the capacity of its current infrastructure to support improvement and build capacity in LEAs to implement, scale up, and sustain the use of evidence-based practices to improve results for children with disabilities. State systems that make up its infrastructure include, at a minimum: governance, fiscal, quality standards, professional development, data, technical assistance, and accountability/monitoring. The description must include current strengths of the systems, the extent the systems are coordinated, and areas for improvement of functioning within and across the systems. The State must also identify current State-level improvement plans and initiatives, including special and general education improvement plans and initiatives, and describe the extent that these initiatives are aligned, and how they are, or could be, integrated with, the SSIP. Finally, the State should identify representatives (e.g., offices, agencies, positions, individuals, and other stakeholders) that were involved in developing Phase I of the SSIP and that will be involved in developing and implementing Phase II of the SSIP.

• State-identified Measurable Result(s) for Children with Disabilities: A statement of the result(s) the State intends to achieve through the implementation of the SSIP. The State-identified result(s) must be aligned to an SPP/APR indicator or a component of an SPP/APR indicator. The State-identified result(s) must be clearly based on the Data and State Infrastructure Analyses and must be a child-level outcome in contrast to a process outcome. The State may select a single result (e.g., increasing the graduation rate for children with disabilities) or a cluster of related results (e.g., increasing the graduation rate and decreasing the dropout rate for children with disabilities).

• Selection of Coherent Improvement Strategies: An explanation of how the improvement strategies were selected, and why they are sound, logical and aligned, and will lead to a measurable improvement in the State-identified result(s). The improvement strategies should include the strategies, identified through the Data and State Infrastructure Analyses, that are needed to improve the State infrastructure and to support LEA implementation of evidence-based practices to improve the State-identified Measurable Result(s) for Children with Disabilities. The State must describe how implementation of the improvement strategies will address identified root causes for low performance and ultimately build LEA capacity to achieve the State-identified Measurable Result(s) for Children with Disabilities.

• Theory of Action: A graphic illustration that shows the rationale of how implementing the coherent set of improvement strategies selected will increase the State’s capacity to lead meaningful change in LEAs, and achieve improvement in the State-identified Measurable Result(s) for Children with Disabilities.

Phase II: Plan

The focus of Phase II is on building State capacity to support LEAs with the implementation of evidence-based practices that will lead to measurable improvement in the State-identified Measurable Result(s) for Children with Disabilities. Phase II builds on the data and infrastructure analyses, coherent improvement strategies, and the theory of action developed in Phase I. The plan developed in Phase II includes the activities, steps and resources required to implement the coherent improvement strategies, with attention to the research on
implementation, timelines for implementation and measures needed to evaluate implementation and impact on the State-identified Measurable Result(s) for Children with Disabilities.

- Infrastructure Development: Specify improvements that will be made to the State infrastructure to better support LEAs to implement and scale up evidence-based practices to improve the State-identified Measurable Result(s) for Children with Disabilities. Identify the steps the State will take to further align and leverage current improvement plans and initiatives in the State, including general and special education improvement plans and initiatives, which impact children with disabilities. This section must also identify who will be in charge of implementing the changes to infrastructure, resources needed, expected outcomes, and timelines for completing improvement efforts. In addition, the State should specify how it will involve multiple offices within the State educational agency (SEA), as well as other State agencies, in the improvement of its infrastructure.

- Support for LEA Implementation of Evidence-Based Practices: Specify how the State will support LEAs in implementing the evidence-based practices that will result in changes in LEA, school, and provider practices to achieve the State-identified Measurable Result(s) for Children with Disabilities. This section must identify steps and specific activities needed to implement the coherent improvement strategies, including communication strategies and stakeholder involvement; how identified barriers will be addressed; who will be in charge of implementing; how the activities will be implemented with fidelity; the resources that will be used to implement them; how the expected outcomes of the improvement strategies will be measured; and timelines for completion. In addition, the State should specify how it will involve multiple offices within the SEA (or other State agencies) to support LEAs in scaling up and sustaining the implementation of the evidence-based practices once they have been implemented with fidelity.

- Evaluation: The evaluation must include short-term and long-term objectives to measure implementation of the SSIP and its impact on achieving measurable improvement in State-identified result(s) for children with disabilities. The evaluation must be aligned to the theory of action and other components of the SSIP, include how stakeholders will be involved, and include the methods that the State will use to collect and analyze data to evaluate implementation and outcomes of the SSIP. The evaluation must specify how the State will use the information from the evaluation to examine the effectiveness of the implementation of the SSIP and the progress toward achieving intended improvements in the State-identified Measurable Result(s) for Children with Disabilities, and to make modifications to the SSIP as necessary, and how information from the evaluation will be disseminated to stakeholders.

Phase III: Implementation and Evaluation

In Phase III, the State must, consistent with the evaluation described in Phase II, assess and report on its progress in implementing the SSIP. This will include data and analysis on the extent to which the State has made progress toward and/or met the State-established short-term and long-term objectives for implementation of the SSIP and its progress in achieving the State-identified Measurable Result for Children with Disabilities. If the State intends to continue implementing the SSIP without modifications, the State must describe how the data from the evaluation support this decision. Also, the State must provide a rationale for any revisions that have been made, or revisions the State plans to make, in the SSIP in response to evaluation data, and describe how stakeholders were included in the decision-making process.
Paperwork Burden Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1820-0624. It is estimated that respondents will spend approximately 1,700 hours when maintaining and completing the SPP/APR. These times include such things as reviewing instructions, searching any existing data resources, gathering needed data, analyzing collected data, and completing and reviewing the information collection. The obligation to respond to this collection is mandatory (20 U.S.C. 1400, Individuals with Disabilities Education Act (IDEA)). Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, 400 Maryland Ave., SW, Washington, DC 20202-4536 or email ICDocketMgr@ed.gov and reference the OMB Control Number 1820-0624. Note: Please do not return the completed SPP/ APR to this address.
